

INDEX TO VOLUME 126

Alphabetical Table of Contents of Authors

- ABRAMSKY, ZVIKA. See MICHAEL L. ROSEN-ZWEIG
- ALBERCH, PERE. Developmental constraints: why St. Bernards often have an extra digit and poodles never do, 430
- ANTOLIN, MICHAEL F., and CURTIS STROBECK. The population genetics of somatic mutation in plants, 52
- BAIRD, DONNA DAY. See ELMER C. BIRNEY
- BANCROFT, G. THOMAS. The influence of total nest failures and partial losses on the evolution of asynchronous hatching, 495
- BERTIN, ROBERT I. Nonrandom fruit production in *Campsis radicans*: between-year consistency and effects of prior pollination, 750
- BIRNEY, ELMER C., and DONNA DAY BAIRD. Why do some mammals polyovulate to produce a litter of two? 136
- BRENOWITZ, ELIOT A. See MICHAEL J. RYAN
- BROWN, KENNETH M. See DENNIS J. MINCHELLA
- BULMER, M. G. Selection for iteroparity in a variable environment, 63
- CHRISTIANSEN, FREDDY BUGGE. Selection and population regulation with habitat variation, 418
- COMINS, H. N., and I. R. NOBLE. Dispersal, variability, and transient niches: species coexistence in a uniformly variable environment, 706
- CORNELL, HOWARD V. Species assemblages of cynipid gall wasps are not saturated, 565
- COUVET, DENIS, JEAN-PIERRE HENRY, and PIERRE-HENRI GOUYON. Sexual selection in hermaphroditic plants: the case of gynodioecy, 294
- COX, GEORGE W. The evolution of avian migration systems between temperate and tropical regions of the New World, 451
- COYNE, JERRY A., and RUSSELL LANDE. The genetic basis of species differences in plants, 141
- CROZIER, ROSS H., and PETER LUYKX. The evolution of termite eusociality is unlikely to have been based on a male-haploid analogy, 867
- DEANGELIS, D. L., J. A. KITCHELL, and W. M. POST. The influence of naticid predation on evolutionary strategies of bivalve prey: conclusions from a model, 817
- DIONNE, MICHELE. Cannibalism, food availability, and reproduction in the mosquito fish (*Gambusia affinis*): a laboratory experiment, 16
- DOBSON, F. STEPHEN, and W. THOMAS JONES. Multiple causes of dispersal, 855
- DOWSE, HAROLD. See JOHN RINGO
- DUNHAM, ARTHUR E., and DONALD B. MILES. Patterns of covariation in life history traits of squamate reptiles: the effects of size and phylogeny reconsidered, 231
- EADIE, JOHN MCA., and HARRY G. LUMSDEN. Is nest parasitism always deleterious to goldeneyes? 859
- ECHELLE, ANTHONY A. See STEPHEN T. ROSS
- EHRHARDT, DAVID. See JOHANNA SCHMITT
- ELLSTRAND, NORMAN C., and DIANE L. MARSHALL. Interpopulation gene flow by pollen in wild radish, *Raphanus sativus*, 606
- ELLSTRAND, NORMAN C. See DIANE L. MARSHALL
- FINDLEY, JAMES S., and MURIEL T. FINDLEY. A search for pattern in butterfly fish communities, 800
- FINDLEY, MURIEL T. See JAMES S. FINDLEY

Alphabetical Table of Contents of Titles

- Aposematic insects as six-legged fruits: incidental short-circuiting of their defense by frugivorous birds. Carlos M. Herrera, 286
- Are lizard population sizes unusually constant through time? Thomas W. Schoener, 633
- Asymmetrical competition: are larger animals competitively superior? Lennart Persson, 261
- Cannibalism, food availability, and reproduction in the mosquito fish (*Gambusia affinis*): a laboratory experiment. Michele Dionne, 16
- Coevolution and invasion in competitive guilds. Volker Loeschcke, 505
- Colors of fruit displays of bird-dispersed plants in two tropical forests. Nathaniel T. Wheelwright and Charles H. Janson, 777
- Competition among immatures affects their adult fertility: population dynamics. Timothy Prout and Frances McChesney, 521
- Competition among parasitoids of endophytic hosts. Don C. Force, 440
- The continuing search for order. Robert R. Sokal, 729
- Detecting density-dependent habitat selection. Michael L. Rosenzweig and Zvika Abramsky, 405
- Developmental constraints: why St. Bernards often have an extra digit and poodles never do. Pere Alberch, 430
- Differential dispersal of self-fertilized and outcrossed progeny in jewelweed (*Impatiens capensis*). Johanna Schmitt, David Ehrhardt, and Daniel Swartz, 570
- Dispersal, variability, and transient niches: species coexistence in a uniformly variable environment. H. N. Comins and I. R. Noble, 706
- Distribution of *Drosophila melanogaster* on alternative resources: effects of experience and starvation. Ary A. Hoffmann and Michael Turelli, 662
- Does heavy grazing usually improve the food resource for grazers? Mark Westoby, 870
- Dominance in marine ecosystems: a comment. Marcel Rejmánek, Elaine Parton, Jean Pantell Sikora, and Walter B. Sikora, 724
- Dynamics of ecologically obligate mutualisms—effects of spatial diffusion on resilience of the interacting species. Vivian Hutson, Richard Law, and David Lewis, 445
- Effects of experience on oviposition and attraction in *Drosophila*: comparing apples and oranges. Ary A. Hoffmann, 41
- The evolutionary ecology of seed heteromorphism. D. Lawrence Venable, 577
- Evolutionary importance of overspecialization: insect parasitoids as an example. Armand M. Kuris and Stephen F. Norton, 387
- The evolution of avian migration systems between temperate and tropical regions of the New World. George W. Cox, 451
- The evolution of termite eusociality is unlikely to have been based on a male-haploid analogy. Ross H. Crozier and Peter Luykx, 867
- Evolution of vertebrate flight: an aerodynamic model for the transition from gliding to active flight. Ulla M. Norberg, 303
- An experimental test of the idea that food supply limits growth rate in a tropical pelagic seabird. R. E. Shea and R. E. Ricklefs, 116
- An experiment testing two hypotheses of speciation. John Ringo, David Wood, Robert Rockwell, and Harold Dowse, 642
- Foraging in a dynamic mimicry complex. Peter Nonacs, 165
- The genetic basis of species differences in

- plants. Jerry A. Coyne and Russell Lande, 141
- Group selection, altruism, and structured-deme models. Len Nunney, 212
- Host and parasite counteradaptations: an example from a freshwater snail. Dennis J. Minchella, Bonnie K. Leathers, Kenneth M. Brown, and James N. McNair, 843
- Infectious disease and species coexistence: a model of Lotka-Volterra form. Robert D. Holt and John Pickering, 196
- The influence of naticid predation on evolutionary strategies of bivalve prey: conclusions from a model. D. L. DeAngelis, J. A. Kitchell, and W. M. Post, 817
- The influence of size and phylogeny on life history variation in reptiles: a response to Stearns. S. Blair Hedges, 258
- The influence of total nest failures and partial losses on the evolution of asynchronous hatching. G. Thomas Bancroft, 495
- The intensity of selection: intersexual and interspecific comparisons require consistent measures. Pepper W. Trail, 434
- Interpopulation gene flow by pollen in wild radish, *Raphanus sativus*. Norman C. Ellstrand and Diane L. Marshall, 606
- Is nest parasitism always deleterious to goldeneyes? John McA. Eadie and Harry G. Lumsden, 859
- Life span, competition, and delayed plumage maturation in male passerines: the breeding threshold hypothesis. Michael V. Studd and Raleigh J. Robertson, 101
- Limiting resources and territoriality in microtine rodents. Richard S. Ostfeld, 1
- The location theory of animal populations: the case of a spatially uniform food distribution. Donald W. Jones and John R. Krummel, 392
- Maximization of primary and secondary productivity by grazers. T. R. Sea-stedt, 559
- Metatherian reproduction: transitional or transcending? Virginia Hayssen, Robert C. Lacy, and Pamela J. Parker, 617
- Multiple causes of dispersal. F. Stephen Dobson and W. Thomas Jones, 855
- Nonrandom fruit production in *Campsis radicans*: between-year consistency and effects of prior pollination. Robert I. Bertin, 750
- Optimal hatching asynchrony in birds: comments on Richter's critique of Clark and Wilson's model. David J. T. Hussell, 123
- Ornithopod feeding mechanisms: their bearing on the evolution of herbivory. David B. Norman and David B. Weishampel, 151
- Patterns of covariation in life history traits of squamate reptiles: the effects of size and phylogeny reconsidered. Arthur E. Dunham and Donald B. Miles, 231
- Persistence of stream fish assemblages: effects of environmental change. Stephen T. Ross, William J. Matthews, and Anthony A. Echelle, 24
- Population dynamics of avian brood parasitism. Robert M. May and Scott K. Robinson, 475
- The population genetics of somatic mutation in plants. Michael F. Antolin and Curtis Strobeck, 52
- Proximal causes of multiple paternity in wild radish, *Raphanus sativus*. Diane L. Marshall and Norman C. Ellstrand, 596
- Rapidly induced defenses and talking trees: the devil's advocate position. Simon V. Fowler and John H. Lawton, 181
- The relative importance of behavioral and physiological adjustments controlling body temperature in terrestrial ectotherms. R. D. Stevenson, 362
- Reply to Coyne and Lande. L. D. Gottlieb, 146
- The resource-ratio hypothesis of plant succession (Erratum). David Tilman, 872
- The role of body size, phylogeny, and ambient noise in the evolution of bird song. Michael J. Ryan and Eliot A. Brenowitz, 87
- A search for pattern in butterfly fish communities. James S. Findley and Muriel T. Findley, 800

- Selection and population regulation with habitat variation. Freddy Bugge Christiansen, 418
- Selection for iteroparity in a variable environment. M. G. Bulmer, 63
- Sex-biased philopatry and dispersal in birds and mammals: the Oedipus hypothesis. Olof Liberg and Torbjörn von Schantz, 129
- Sex of infants produced by male rhesus macaques. Meredith F. Small and David Glenn Smith, 354
- Sex ratios of nestling and fledgling red-cockaded woodpeckers (*Picoides borealis*) favor males. Patricia Adair Gowaty and Michael R. Lennartz, 347
- Sexual selection in hermaphroditic plants: the case of gynodioecy. Denis Couvet, Jean-Pierre Henry, Pierre-Henri Gouyon, 294
- Some comments on Connell's and my reviews of field experiments on interspecific competition (Erratum). Thomas W. Schoener, 300
- Spatial variation in an alga-sponge commensalism and the evolution of ecological interactions. Stephen R. Palumbi, 267
- Species assemblages of cynipid gall wasps are not saturated. Howard V. Cornell, 565
- The stable coexistence of two competitors for one resource. Richard R. Vance, 72
- Stochasticity and assemblage organization in an Indiana stream fish assemblage. Gary D. Grossman, Mary C. Freeman, Peter B. Moyle, and John O. Whitaker, Jr., 275
- Surplus killing in the hunting strategy of small predators. Tarja Oksanen, Lauri Oksanen, and Stephen D. Fretwell, 328
- Time constraints and diet choice: different predictions from different constraints. Jeffrey R. Lucas, 680
- The vertical component of plant species diversity in temperate and tropical forests. John Terborgh, 760
- Why do some mammals polyovulate to produce a litter of two? Elmer C. Birney and Donna Day Baird, 136
